EDUCATION

National Polytechnic Institute (IPN, ESCOM)

Mexico City, Mexico

B.Eng. in Computer Systems Engineering

Expected graduation in December 2027

Competitive Programming Instructor — Algorithmic Club: Taught competitive programming topics covering algorithms, data structures, and problem-solving techniques. (Aug 2023 – Dec 2025)

INTERNSHIP EXPERIENCE

Microsoft Mexico

Remote

Software Engineer Intern

Feb 2026 – Aug 2026, Part-time

- **Copilot Telemetry and Observability System:** Architected a PowerShell-based telemetry pipeline tracking Copilot agent decision paths, skill invocations, session states, and execution results.
- **Failure and Skill Analytics:** Created Grafana monitoring dashboards to track skill failure rates and session errors, drastically improving observability into AI agent reasoning and failure modes.
- **Automated Agent Deployment:** Developed PowerShell scripts and a GitHub CI pipeline to automate environment setup, permission validations, and update rollouts.

AWARDS & ACHIEVEMENTS

Qualified: The 2026 ICPC World Finals in Dubai, UAE. (Apr 2027)

Seventeenth Place: The 2026 ICPC Latin America Championship in Chile. (Nov 2025)

Fifth Place: The 2025 ICPC Mexico Finals. (Nov 2025)

Champion: The 2025 ICPC Mexico Grand Prix. (Apr 2025 – Oct 2025)

Honorable Mention: The 2025 ICPC Latin America Championship in Brazil. (Mar 2025)

Second Place: The 2024 ICPC Mexico Finals. (Nov 2024)

Fifth Place: The 2023 International Collegiate Programming Contest (ICPC) Mexico Finals. (Oct 2023)

Bronze Medal: Ibero American Informatics and Computing Competition (CIIC) . (Jun 2022)

Gold Medal: Mexican Olympiad in Informatics (Sep 2021)

SCHOOL PROJECTS

Book Recommendation | [GitHub](#)

- Developed a RESTful backend for a book recommendation platform using Spring Boot, with Dockerized deployment for environment consistency
- Designed REST APIs for book management, user interactions, and personalized recommendations.

OrderEat | [GitHub](#)

- Built the backend of a dark-kitchen management platform using Java Servlets and JSP, with user authentication and session management
- Designed a relational MySQL schema to manage orders, menus, and customer information.

SKILLS

Languages: C/C++, Java, JavaScript, SQL, Powershell

Frameworks: SpringBoot

Databases: PostgreSQL, MySQL

Tools: Maven, Git, Docker
